LISTING OF THE CLAIMS

Claims 1 – 40 (Cancelled)

41.   (Currently Amended)   A method for transforming and canonicalizing semantically structured data, the method comprising the steps of:

5   using a user interface having a voice portal to obtain data from a network of computers, wherein said step of using a user interface having a voice portal to obtain data comprises sending voice command to said network of computers, wherein said user interface further comprises at least one of ~~the~~ steps of:

          identifying ~~said~~ a user with a phone number;

10   starting a new session for said user;

          adding a new interaction;

          updating a preference of said user within a domain;

          enabling said preference of said user within said domain;

          disabling said preference of said user within said domain;

15   updating an expertise level of said user;

          updating personal information of said user;

          updating session state of said user;

          adding credit card information of said user; and

          updating said credit card information of said user;

20   applying text patterns to the obtained data and placing the obtained data in a first data file;

          providing a second data file containing the obtained data in a uniform format; and

          generating grammatical sentences from the obtained data according to a
25   specific user interface in the second data file.
